Most people think Google is some kind of public library of information available at one's fingertips, providing straight facts about anything under the sun, but nothing could be further from the truth, especially when it comes to health, safety, and human rights topics. No doubt, with over 85 percent of the search market share and 95 percent of mobile traffic, Google is by far the most popular search engine (talk about monopolies).

Worldwide, [nearly 100 million students](#) and teachers use "G Suite" as a primary source of information, and more than 40 million use Google Classroom as a "learning management" system, but there are major pitfalls to all of this, and few realize it. Like Wikipedia, most information about natural health is warped, twisted, censored, wrongfully discredited, and labeled as "quack medicine."

AI and algorithms are adding quickly to this chaos, denying billions of people the right to helpful information that could change their lives, extend their lives, prevent and heal sicknesses and diseases.

More powerful and worse than Wikipedia and WebMD, evil Google has billions of people fooled about their health and

safety

There used to be a term called "burning of books," which literally meant burning certain history books so the general literate public couldn't look up information about events that politicians and pharma goons don't want anyone knowing the truth about. Today, burning books is much simpler, as no fire is needed, and not even trash cans or dumpsters.

Google deliberately "burns books" by [mass censoring](#) all "non-mainstream" health websites that gain popularity for telling the truth about important health (and safety) topics. This is especially true regarding the pandemic (a.k.a. plandemic) and the deadly mRNA "vaccinations" that cause vascular clots, [turbo cancer](#), [long-vax syndrome](#), and autoimmune disorders.

The biggest bonfire book burning "ceremony" is taking place daily now, hosted by Google search engine, and millions, if not billions, of [people's search results are changed, blocked](#), and banned behind the scenes. This is no conspiracy theory either. Even when the proper health and safety search results do show up, they don't show up on the first page of results, even if they are the most popular searches. This is all part of Google's algorithms and AI effort to work in tandem with Big Pharma to suppress natural cures and prevention of diseases, disorders, and holistic medicine in general.

Google functions as the "thought police" for all things health and safety related, as they de-platform and censor valuable and often vital information for surviving the onslaught of lab-created diseases in this new age of sickness. High quality health content, for example, about ivermectin, vitamin D, zinc, and quercetin, helping combat and prevent Covid-19 infections is nowhere to be found if you use Google's search engine.

Even research and clinical information published in academic medical journals is censored by Google when it helps people find out about pharmaceuticals and vaccines that cause more harm than good. Google is NOT transparent about all this policing and book burning that's going on, and that is for sure. Most Americans have no clue, especially children, teens, and those who also think social media is a source of actual real news and information.

It is important that every person realize that Google is an technology company that is a subsidiary of a corporation, focused on artificial intelligence and controlling media platforms and operating systems. They are a monopoly on information control and "too big to fail," many would attest. It's [a Google dictatorship](#). The Google Nazis are spreading propaganda and censoring anything that counters the mainstream "narrative."

Do your own research and don't use Google. Try the search engine [Brave BETA](#) and get more truth news and real information. Bookmark [Censored.news](#) to your favorite websites for news about big tech and mental health horror stories that are being censored from mass media while you read this.
